1

1) College Information System.

problem statement

The existing system which we are using in clg is traditional process, we were using paper and pen. admissions are increasing day by day it is difficult

SRS

we maintain day to day information, updates of students and employees we manage information of books, Question paper also helps in quick and easy access.

→ Educational institutions should be able to add, edit & view student details like name, age, gender, email, phone number, address & so on.

→ Educational institutions should be able to add, and view student academic details, like usn, department, semester and registered courses.

→ Faculty should be able to view all student personal details, and should be able to view. and edit internal evaluation marks and attendance of students.

→ The COE office should be able to view all student personal details, and should be able to view and edit internal evaluation marks and attendance of students.

→ placement section should be able to view all student details, and add companies coming to the compus for placements.

→ management section should be able to view, add and edit teaching and non-teaching staff details.

→ students should not be allowed to edit their personal or academic details

→ The system should be convenient and easy to use by students, management and faculty

→ The system should be a reliable source of information viewing for students, WE and faculty.
